FACIAL ENHANCERS:

Is a safe and effective way to reduce facial wrinkles. Botox is used between the brows, forehead, and crows feet to give a natural and refreshed look.

This product is made from hyaluronic acid, a natural component of the skin that decreases as we age. Juvederm is used to fill folds, depressions, scars and lips and can last up to nine months.

Utilizing calcium and a gel filler, this product offers immediate correction of deeper lines and wrinkles. Commonly used around the mouth, chin, cheeks, and hands, Radiesse lasts 9-18 months.

This unique volumizing product stimulates one's own collagen to grow and improves facial contour. Sessions are required monthly for three to four months, and results can last up to three years.

This prescription topical therapy is used to promote eyelash growth, making them longer, thicker and darker.

These physician-directed procedures are discounted when purchased with spa services.
